SUBJECT: Tools Price Increase Notification

Valued Customers:

Like all manufacturers of insulation and related products, we have continued to feel inflationary pressures from the manufacturers that we source Tools from. We will be adjusting our Tool prices to help us account for these cost increases which are out of our control. Price Increases will typically be in the range of 6%-15% on most Tools, with some exceptions falling outside that range in the 15%-30%.

We will be sending out price pages later this month, thank you for your patience. Below you will find the categories that will be effected by this price increase. The price increase will go into effect June 6th, 2022. Orders may be placed at the current pricing up until the end of the day Friday, June 3rd, 2022.

Category	Increase
